Leandro Loiácono

xp & work

Full Stack Developer
<div align="right">SOLID
Dec 2021 - Present</div>

Front-end Development:
- Layout of websites, emails, and customizable modules on the HubSpot platform.
- Technologies used: HTML, CSS, JavaScript, and HubL.

Back-end Development and Integrations:
- Internal development projects for clients, including custom integrations between various systems.
- Recent example: Integration between Airtable, Holded, and a Linux server on DigitalOcean using JavaScript/Node.

Custom Developments:
- Implementation of tailored solutions both inside and outside HubSpot.

Project Management:
- Participation in client meetings to gather requirements.
- Delivery and presentation of complete developments.

bio

As a passionate Full Stack Developer with over three years of experience, I thrive on new challenges and continuous learning. My journey began in Argentina, where I initially worked in customer service, dedicating my free time to exploring programming, photography, and new languages. This diverse background laid a strong foundation for my future in tech.

In 2019, I took a bold step by moving to Barcelona and enrolling in a Full Stack Web Development Bootcamp at Ironhack. This decision transformed my career and personal life, opening doors to the exciting world of web development. Since then, I have specialized in creating and maintaining digital solutions, focusing on both front-end and back-end development.

Driven by a passion for innovation and excellence, I continue to push the boundaries of my skills and knowledge, eager to contribute to impactful projects and collaborate with talented professionals.
